

Sambhav Mehra

SOC Analyst L1 | Incident Coordinator | SIEM & Threat Detection

+91 99930 16789 | sambhavmehra07@gmail.com | linkedin.com/in/sambhav-mehra | github.com/sambhavmehra

Professional Summary

Cybersecurity enthusiast and B.Tech student with hands-on experience in SOC operations, threat detection, SIEM monitoring, ethical hacking, OSINT, and AI-driven security automation. Skilled in Wazuh, Nmap, Burp Suite, Metasploit, and Wireshark, with practical knowledge of log analysis, alert triage, incident investigation, MITRE ATT&CK framework, and network security. actively participating in CTF challenges with strong analytical and problem-solving abilities.

Technical Skills

SOC / SIEM	Microsoft Sentinel, Wazuh, Splunk (fundamentals), SIEM log analysis, alert triage, incident investigation, IDS/IPS, threat hunting, CrowdStrike, ENS.
Frameworks	MITRE ATT&CK, OWASP Top 10, Cyber Kill Chain, incident response lifecycle
Networking	TCP/IP, DNS, DHCP, firewall rules, packet analysis, Wireshark, Nmap
Pentesting	Metasploit, Burp Suite, OWASP ZAP, Nmap, ethical hacking, OSINT, vulnerability analysis.
Programming	Python, Bash scripting, C++, SQL
Tools & Infra	Docker, Git, GitHub, n8n, TheHive, JIRA, VirusTotal API.
OS	Linux (Ubuntu, Kali), Windows

Projects

SIEM-IDS Integration — Python | Wazuh | Suricata | Machine Learning

- Engineered a custom Intrusion Detection System detecting DDoS (T1498), brute-force (T1110), and HTTP anomalies, all mapped to MITRE ATT&CK, with correlation rules flagging 10+ failed logins within 60 seconds and zero false negatives in testing.
- Replicated a full SOC pipeline end-to-end — log ingestion, custom Wazuh detection rules, alert triage, and a real-time continuous monitoring dashboard — proficiency across the complete threat detection and response lifecycle.

Phishing Triage Automation — n8n | TheHive | JIRA | VirusTotal API

- Architected an n8n playbook-driven automation workflow that ingests phishing emails, extracts headers, URLs, and attachments, and queries VirusTotal, AbuseIPDB, and URLscan.io for IOC enrichment including malicious document sandbox analysis.
- Implemented automated severity classification per alert; auto-created TheHive cases with pre-tagged observables and JIRA tickets on confirmed threats — reducing mean time-to-triage by ~70% with zero manual steps in the pipeline.

AERIS — AI-Powered Cybersecurity Assistant — Python | Groq API | Automation

- Developed an AI-powered security assistant capable of OSINT-based intelligence gathering, network reconnaissance, log analysis, and automated SOC operations through natural language interaction within Linux environments.
- Integrated AI-driven workflows for threat investigation, SOC alert analysis, suspicious activity monitoring, and real-time command execution to accelerate incident response operations.

Certifications & Achievements

- Ethical Hacking (CEH)** — Skill India
- CCNA** (Cisco Certified Network Associate) — Cisco Networking Academy
- Practical Cyber Security for Practitioners** — NPTEL | IIT Kanpur
- Ethical Hacking Training** — Hacker Academy
- Python Essentials 1 & 2** — Cisco Networking Academy
- Co-Inventor** — Patent filed (2025): Blockchain-Based Security Device for Cloud Data Protection
- Microsoft SOC Toolkit** — Microsoft
- Research Author** — *Enhancing Security in Electronic Health Records: A Multi-Layered Approach to Data Protection and Privacy* (Presented 2025)
- 1st Place** — College-level CTF Competition “Crack the Hack”
- NCC ‘A’ Certificate** — National Cadet Corps (Army Wing), demonstrating leadership and discipline

Education

Bachelor of Technology — CSE (Cyber Security)	2022 – 2026
Sagar Institute of Science & Technology, Bhopal, MP	CGPA: 7.13
Higher Secondary (Class XII)	2022
Model Higher Secondary School, Ujjain, MP	79.4%
